DETAILED ACTION

Allowable Subject Matter

Claims 1, 3 – 5, 13, 15 and 16 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 and 13:

Nishikawa et al. shows a TM mode columnar dielectric resonator (Figs. 15 and 16) comprised of a center portion (4) with a higher dielectric constant and an outer portion with a lower dielectric constant (41) but does not show the opposite configuration. El-Sharawy (Figs. 7 and 8) shows a TE mode resonator comprised of a central portion (46) with a higher dielectric constant and an outer portion with a lower dielectric constant (44) but only teaches an advantage with respect to the TE mode resonator.

Claims 15 and 16:

Nishikawa et al. (Fig. 32) shows a resonator with an elastic layer (151) but the lid is not between lid (82) and case body (comprised of side walls 81) but adjacent or on an equal plane to the side walls. The conductive layer (70) also is not between the lid and case body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
